INTEMPORARY PATIO DOOR

A patio door with unique design
MADE BY

INOVA

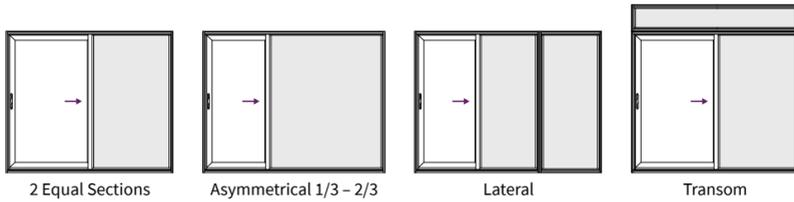

INTEMPORARY PATIO DOOR

Timeless Patio Door

The **INOVA** Patio Door integrates **high performance** and **aesthetic**. With a modern design or classic style, it will **adapt to all projects** depending on chosen options. It offers a refined style that maximizes brightness, and its maintenance is facilitated by a cover of resistant anodized threshold. Its performance will help you face the reality of our climatic variations. A product entirely manufactured at our plant to ensure the highest standard of quality.

- Triple glass thermos, 1 or 2 energy + argon gas
- Brick or cladding molding with extension anodized threshold
- Interior extension available up to 16 3/16"
- Foot lock
- Key lock
- Tinted glass
- Exterior aluminum color: Clear anodized
- Unlimited choice of colors

Handles

- Standard:
- Crest model
- Colors: White, Black, Brushed nickel

- Optional:
- Involute model
- Indoor/Outdoor
- Color: White

Moldings

Foot Lock

Lift-and-slide Patio Door

Allowing incomparable ease of operation, Lift-and-slide hardware further reduces by 50% the necessary strength for the operation of the patio door. The system raises the shutter when the opening, slides without friction to rest it on the seals when closing.

The security and tightness of the door are guaranteed by 3 anchor points while the materials offer increased protection against corrosion.

The contemporary handle offers an optimal clearance in use. It is offered with black or stainless steel finish and handle 2-sided lift also includes a key lock.

Maximize the panoramic effect of your patio door with large dimensions in 2 sections thanks to a very heavy load capacity door.

Lifting Handle 2 Sides

Structural and Thermal Performances

The **INOVA** Patio Door was tested by independent laboratories (AIR-INS) and meets the harmonized standard AAMA/WDMA/CSA 101/I.S.2/A440. Also qualified for ENERGY STAR® (ER), the **INOVA** Patio Door meets following standards:

Superior Structural Design with Reinforced Mullion

Water Resistance at 20 °C

Air Leakage Resistance at 20 °C

Standards	Air Tightness	Water Resistance (PA)	Wind-load Resistance (PA)	Forced Entry	Rating Size
AAMA/WDMA/CSA 101/I.S.2/A440	A1 A2 A3	140 400	720 2640	F10 F20	R-CP55-SD (71" X 81")

The **INOVA** Patio Door meets all ENERGY STAR® Canada standards with an Energy Rating (ER) of 37 with double glass and 42 with triple glass (no grid). Results may vary depending on type of insulated glass ordered. PVC profiles are produced with a special PVC powder formula that was developed to get an outstanding finish but also strong enough to face our rude Northern climate.

Very Robust Design

Double point mortise lock system to get higher forced entry rating and steel reinforcements inserted in mullion and opening sash give superior structural resistance.

Mortise Lock and Adjustable Keeper

Easy Installation

- Pre-drilled frame for easy installation.
- Clipped PVC jamb liner to cover installation screws.
